EDUCATION

University of Waterloo

Bachelor of Computer Science

Relevant coursework: *Neural Networks, Numerical Computation and Data Structures & Data Management*

Waterloo, ON

September 2023 – April 2028

EXPERIENCE

Software Developer I - Full-stack (Incoming)

May 2026 – Aug 2026

Intact Financial Corporation

Montreal, Canada

- Incoming full-stack developer working with React, Spring Boot, and distributed systems in an Agile team.
- Will design, implement, and ship production features end-to-end.

Software Developer I - Backend

Sep 2025 – Dec 2025

Intact Financial Corporation

Montreal, Canada

- Designed and shipped backend features across Spring Boot microservices using Java, Kubernetes, and Kafka.
- Implemented a multilingual logo-selection system across Angular and Thymeleaf services, deployed to production with full test coverage.
- Increased test coverage up to 90% across 3 Spring Boot services using JUnit and Spring Boot Test, reducing the risk of regression in critical flows.
- Resolved critical SOAP and REST API issues, improving reliability and cross-team integrations.
- Led observability efforts by adding service-level metrics and building Dynatrace dashboards for 7 services.

Student AI Researcher - Applied Strategy

Jan 2025 – Apr 2025

Waterloo Experience Accelerate — Local Technologies Inc.

Remote

- Conducted applied AI research on recommendation systems, predictive analytics, and AI-driven engagement strategies.
- Analyzed real-world implementations to identify scalable solutions for small and local businesses.
- Delivered reports translating AI capabilities into actionable product decisions.

PROJECTS

Agent² | Python, FastAPI, Railtracks, Playwright, Telnyx, AWS

Mar 2026 – Mar 2026

- Built an AI-powered real estate assistant that converts natural phone conversations into structured home search criteria and returns matching listings by SMS.
- Developed a voice-to-search pipeline using Telnyx voice streaming, PersonaPlex speech processing, and LLM-based extraction to interpret user preferences.
- Implemented automated listing discovery and ranking by scraping real estate sites with Playwright and ranking results using LLM-assisted scoring.

Farmesh | Next.js, TypeScript, Supabase, PostgreSQL, Backboard

Mar 2026 – Mar 2026

- Built an AI-assisted coordination platform matching farm supply with restaurant demand using a multi-agent pipeline.
- Implemented agents for intake, normalization, demand interpretation, and vendor matching to convert free-text marketplace inputs into structured data.
- Developed role-based dashboards and matching workflows with transparent AI reasoning for supply-demand recommendations.

Befriend – Your Social Circle | Flutter, Firebase

June 2023 – Aug 2024

- Built and published a cross-platform social app (100+ downloads), managing all aspects from design to deployment on the App Store and Play Store.
- Designed Firebase backend with indexed collections and rule-based access for efficient reads and real-time sync.

TECHNICAL SKILLS

Languages: Java, Python, C++, TypeScript, JavaScript, Swift, HTML, CSS, Dart

Frameworks & Libraries: Spring Boot, React, Next.js, PyTorch, NumPy, FastAPI, Flutter, Firebase

Tools: Git, Microsoft Azure (AZ-900, AI-900), Jenkins, Kafka, Kubernetes, Jira, Postman, Matplotlib

Databases: PostgreSQL, Oracle SQL, MongoDB, Firebase Firestore
